- Web Developer From Scratch by Eduonix   April 1, 2023

- SQL (Basic) by HackerRank   May 6, 2023

PROJECTS

1. Design & Development of NFT Marketplace Website

- **Front End :** HTML , CSS
- **Backend :** PHP
- **DataBase :** postgreSQL
- It's a platform where artists can showcase and sell thier artwork, whether it's photography, drawings, or digital creations. This marketplace not only connects you with art enthusiasts but also protects your creations from unauthorized copying.

2. **Development of Face and Eye Detector using Python**
   - **Language :** Python, XML
   - **Libraries :** NumPy, OpenCV
   - Developed a computer vision project to detect faces and eyes in images or video streams using Python.

3. **Development of Portfolio Website**
   - **Front End :** HTML, CSS
   - **Backend :** JavaScript
   - Explore a dynamic showcase of my work and skills on My Portfolio Website.

INTERNSHIP

Oasis Infobyte

- Acquired proficiency in JavaScript (JS) during the internship.
- Worked on projects involving the development of secure login systems, utilizing JS for the backend logic and data management.
- My internship at Oasis allowed me to gaining hands-on experience in front-end and back-end web development

EXTRA CURRICULAR ACTIVITIES

- Played Cricket On District Level.
- Worked as a Volunteer in Technical Event of RAILMIT 2022.
- Integral Member of Institute NSS Team.
- Participated in University Level Innovative Challenge Competition.
